

THE FIRST AND ONLY CLEFT PALATE CONVENIENCE KIT

WishBone Convenience Kits: Sterile Packed, Ready to Go

Your team aims to provide optimal treatment and care to every patient who needs it—when they need it. This is made possible when surgeons and supporting staff are equipped to work efficiently.

Designed to streamline a palatoplasty procedure from start to finish, the complete Cleft Palate Convenience Kit comes sterile packed and provides all of the medical and surgical items needed for surgery. By eliminating the 'scavenger hunt' for various components, these convenience kits enable teams to devote time where it matters most.

CLEFT PALATE CORRECTIONS

- About 1 in every 1,600 babies is born with cleft lip with cleft palate in the United States.¹
- About 1 in every 2,800 babies is born with cleft lip without cleft palate in the United States.¹
- About 1 in every 1,700 babies is born with cleft palate in the United States.¹

Surgery to repair a cleft palate is recommended within the first 18 months of life or earlier if possible.²
